ABOUT THE SEMINAR

In recent years our growth as a nation has been remarkable and our values, cultures and systems are being acknowledged rightly internationally. Our government strategically planned Amrit mahotsav kal to achieve the aim of being world leader by the year 2047. These initiatives taken by the govt. has the view that every Indian must be well aware about their struggles in their past, glories of their ancestors, their rich heritage, culture, value system, so that they would be able to step in their future with a clarity in their minds about their future endeavours. keeping all this in mind theme chosen for the seminar seemed very appropriate. Scholars from nationwide will meet and show their work in the seminar. They will discuss and analyse that what have been our strengths and weaknesses in our past, what could be learnt from past period and right now which path we are treading into towards our future, how various policies and programs were implemented, what difficulties we faced and what overall impact all this would have on our future. Through this seminar we will surely develop transparent vision and route map which eventually will be transferred to our students about our past present and the future endeavours. Sub themes for this two days National seminar are selected after great thought on the matter. All the themes consciously cover all the awareness of interests, keeping in mind the concept of bhartiya i.e. our education system, values, culture, our indigenous skills etc. The main theme along with sub themes for the proposed two days national seminar are so formulated they will encompass knowledge from varied fields and will ensure participation of scholars from various fields i.e. education, health, government agencies, fitness, history, sociology, agriculture, technology, economics etc. After seminar, detailed report of it including views, recommendations, findings, conclusions etc will be sent to the related agencies, higher education department for their further consideration which will eventually be used in formulating new policies.
